

ERGONOMIC POSTURE ASSESSMENT REPORT

Date: 2028-06-02 10:17:55

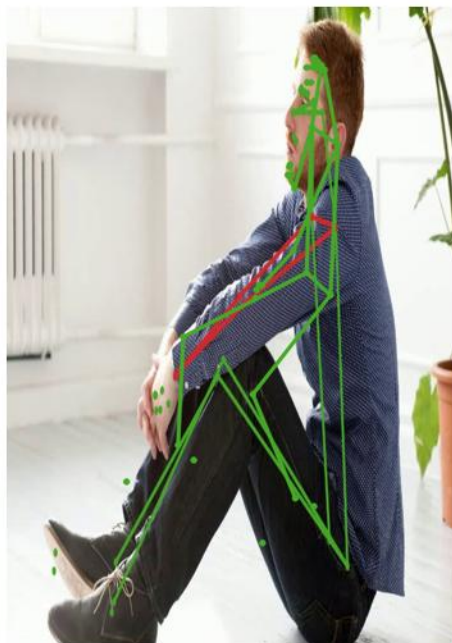

Source: sample_posture_test.mp4

YOUR CURRENT POSTURE

Overall Risk: HIGH

Model confidence: 99.11%

Video summary: LOW 25.0% MEDIUM 25.0% HIGH 50.0%

What we found:

- Good - your neck position looks natural
- Good - your back posture looks upright
- Good - your shoulders look relaxed
- Your shoulders are uneven - check if you are leaning to one side
- Good - your overall alignment looks balanced
- Some body areas were not clearly visible, so this assessment may be less reliable.

WHAT YOU SHOULD DO

Immediate fixes (do these now):

1. Sit evenly on both sides and avoid leaning onto one arm.
2. Take a short movement break every 30 minutes.
3. Set your screen so the top edge is around eye level.

Long term improvements

1. Strengthen your upper back with rows and face pulls to help your shoulders sit back.
2. Set a posture reminder every hour and rescan after one week.

PROGRESS TRACKING

Come back and scan again after 1 week to see if your posture has improved.
